and Economic Development

Don't miss out! This is your last chance to register!

While many areas of the country have struggled, New Jersey has continued to grow. Our downtowns in particular have made great strides in redevelopment—particularly within the retail and multi-family sectors. Economic development tools are being created, updated and upgraded on a seemingly daily basis as municipalities, developers and community members increasingly understand the importance of retail development in maintaining or enhancing the communities in which we live, work and play. Please join us for a lively panel discussion about new ways to structure public-private partnerships and collaborative processes for creating new tools that can be a win-win for all.

Program Highlights:

Keynote Presentation

Lauren Moore, Executive Director, New Jersey Business Action Center
